

AnandDhara Technologies

Building A sustainable Future –

HVAC Division

- **Complete HVAC Solutions | Turnkey Projects | Clean Room Experts**

About the HVAC Division

- **Our Legacy:** AnandDhara Technologies has long been synonymous with engineering excellence.
- **Our New Mission:** We bring this expertise into a dedicated HVAC Division, offering end-to-end solutions in comfort, air quality, and energy efficiency.
- **Why Us?:** A strong foundation of trust, quality, and innovation serving the critical needs of the HVAC industry.

About Us

- We are a specialized HVAC solutions provider.
- Expertise in design, installation, testing & maintenance.
- Serving cleanrooms, Industrial facilities, Hospitalities & Residential projects.

Our Turnkey Capability

Our Turnkey Approach: From Concept to Commissioning

We handle every step of your projects, providing a single point of contact and ensuring seamless execution.

Design & Engineering → Feasibility studies & system design

Supply & Procurement → High-quality equipment sourcing

Installation & Execution → Expert site management

Commissioning & Validation → Testing & balancing

Operation & Maintenance → Long-term support

Our Services :

HVAC Systems

Chiller Plant & Cooling Towers

Ducting & Piping Works

☐ Clean Room Solutions

Maintenance & AMC

Residential, Commercial,
Hospitalities & Industrial AC

VRV/VRF & Others

Clean Room HVAC Systems : ***Precision & Purity***

We design, Install and validate HVAC systems for controlled environments, Our solutions meet global standards, protecting critical processes from contamination

Key Services:

Custom design : Solutions for Class 100 – Class 100,000.

Pressure control : Maintaining precise Positive/negative pressure maintenance.

Design, validation & certification.

HEPA & ULPA filtration: using high-efficiency filters Particle-free air solutions.

Air sterilization: Advanced UVGI & other sterilization advanced techniques.

Chillers & Cooling Towers :

High-Capacity Cooling Solutions

We provide Robust, energy-efficient cooling systems for industries & commercial applications.

- Chiller systems: Installation Air-cooled & water-cooled chillers.
- Process cooling: Engineered solutions for Precise industrial temperature control.
- Cooling towers : Integrated with chiller plants for optimal heat rejection.
- Piping & Pumping : End-to-end design & execution.
- Operation & maintenance for reliability.
- Customized industrial HVAC solutions.

Ducting & Air Distribution :

Optimizing Airflow : The Art of Ducting

The heart of any HVAC system, our ducting solutions are built for durability and maximum efficiency.

Key Services :

- **Ducting materials:** GI(Galvanized Iron, PUF, Aluminum.
- **Air distribution:** Precise design of Diffusers & Grilles.
- **Ventilation & Exhaust:** Specialized systems for fumes and general ventilation.
- **Air balancing:** Professional airflow optimization Services

VRV/VRF & Other Systems

Versatile HVAC Solutions

- We offer a full range of high Energy-efficient HVAC systems to suit any space, from commercial complex to residential buildings.
- Packaged, split & cassette units: A Complete range of AC Units.
- Building Automation: Integrating smart BMS controls for optimization.

Operation & Maintenance (O&M)

Long-Term Partnership: Our O&M Commitment

Our services ensure your system's long-term performance and reliability.

Key Services:

- AMC contracts: Proactive system checks
- Preventive & predictive maintenance: Anticipating and preventive issues.

- Breakdown support
- Spares & Retrofits: Acces to genuine parts & modernization expertise.

Industries We serve

Our Expertise Across Industries

- Pharmaceuticals & Biotech
- Hospitals & Healthcare
- Research & Labs
- Industrial Complexes
- Commercial & Retail
- Educational Institutions

Why Choose us :

- ✓ Turnkey Expertise: We manage your entire project, Concept to commissioning
- ✓ Clean room specialists: Our specialized knowledge ensures Compliance & quality
- ✓ Quality & reliability: We use the best Premium materials and adhere to rigorous standards
- ✓ Reliable service: Strong O&M commitment
